

LEED v4 DATA SHEET

Structa Wire is proud to support all LEED project teams with products that will make valuable contributions toward earning points and credits for all LEED certification levels.

The following Structa Wire products were assessed for LEED v4 eligibility:

- Structalath III
- Structalath Twin Trac
- Mega Lath
- Structa Corner
- Structa VTruss Walls & Ceilings (Rib Lath)

Structa products are manufactured in Vancouver, Canada and our raw material is primarily sourced in Asia. All of Structa Wire welded wire products are manufactured from hot dipped galvanized low-carbon cold drawn steel wire. The steel used in all Structa Wire products range from 60%-80% recycled steel (comprised of 90% post-consumer and 10% post-industrial content).

Structa Wire Green Building Program Performance Data Chart

Updated to reflect LEED v4 -published April 2016
