Course Name: Lath Selection & Specification to Enhance Stucco Performance

Course No: SW 101

Course Format: This is a structured, face-to-face course

Course Credit: 1 Health Safety & Welfare (HSW) learning unit (LU)

Learning Objectives:

- Explore stucco and stucco composition
- Evaluate alternative stucco lathing
- Identify the advantages and disadvantages of the various lath products and compare lathing alternatives.
- Review the essential design details for stucco wall systems
- Identify specific challenges of stucco wall systems while reviewing best practices and solutions
- Explore Title 24 Compliance and review 3 Coat Stucco Alternatives
- Review ASTM standards and ICC Evaluation
- Explore worker safety and environmental benefits of alternative laths specifically with respect to raw steel and reduction of waste

This course reviews stucco lathing alternatives and challenges of each alternative as well as specific challenges and solutions for stucco as related to control joint detailing, seismic and thermal issues.

Structa Wire products enhance the performance and sustainability of stucco wall systems. All of our products are code compliant and are tested and approved under IAMPO UES 2017
